Investment Strategy	
<ul style="list-style-type: none"> In order to achieve its investment objective, the Sub-Fund invests in P-Notes, a type of market access product. Each P-Note is linked to a composite portfolio comprising a notional underlying basket of A-Shares designed to track as closely as possible, before fees, costs and expenses (including any taxes and withholding taxes), the performance of the SSE 50 Index. The Sub-Fund is currently invested into P-Notes issued by BNP Paribas Arbitrage Issuance B.V. (“BNP”) under its Warrant and Certificate Programme governed by English laws. The Sub-Fund is currently invested into 2 tranches of P-Notes (Tranches A and B). The Tranche A P-Notes are linked to a notional underlying basket of A-Shares held by us under our QFII quota provided via hedging arrangements. The Tranche B P-Notes are linked to a notional underlying basket of A-Shares held by other QFIIs under their QFII quota provided via hedging arrangements. The Sub-Fund may in the future invest in other tranches of P-Notes issued by BNP. A diagram illustrating the current investment strategy of the Sub-Fund (with BNP as the only P-Notes issuer to the Sub-Fund) is set out below: 	<p>Refer to Para 7 on Pg 6 and Para 9.2.4 on Pg 16 of the Prospectus for further information including on the diagram illustrating the investment strategy of the Sub-Fund.</p>

KEY RISKS	
WHAT ARE THE KEY RISKS OF THIS INVESTMENT? The value of the Sub-Fund and its distributions (if any) may rise or fall. These risk factors may cause you to lose some or all of your investment:	Please refer to Para 9 on Pg 15 of the Prospectus for further information.
Market and Credit Risks	
<ul style="list-style-type: none"> ● You are exposed to market risks of A-Shares. <ul style="list-style-type: none"> ○ Exposure of the Sub-Fund is concentrated in a particular market (i.e. A-Shares comprising the SSE 50 Index). Market volatility, lack of a liquid trading market and settlement difficulties in the A-Share markets may adversely affect the net asset value (“NAV”) of the Sub-Fund. ● You are exposed to foreign exchange risks. <ul style="list-style-type: none"> ○ The Sub-Fund is denominated and traded in SGD, its P-Notes are denominated in SGD and the A-Shares are denominated in CNY. The NAV of Units will fluctuate with changes in the market value of the Sub-Fund’s investments and changes in the exchange rate between (i) SGD and USD; (ii) USD and CNY; and (iii) CNY and SGD. You may lose money if the CNY or USD were to depreciate against the SGD even if the market value of the relevant A-Shares actually goes up. We currently do not intend to hedge such foreign currency exposure of the Sub-Fund. ● You are exposed to trading risks. <ul style="list-style-type: none"> ○ The market prices of Units on SGX-ST may trade above or below the NAV of Units and there is a risk that you may not be able to buy or sell Units at a price close to the NAV. 	
Liquidity Risks	
<ul style="list-style-type: none"> ● You are not able to redeem Units directly with us. <ul style="list-style-type: none"> ○ You must approach a participating dealer (whether directly or through a stockbroker) to assist you with your redemption application to us. ○ The minimum amount for redemptions with us is 500,000 Units. If you do not hold at least this amount, you can only realise the value of your Units by selling them on the SGX-ST. ● The secondary market may be illiquid. <ul style="list-style-type: none"> ○ You can sell your Units on the SGX-ST. However, the listing of Units on the SGX-ST does not guarantee a liquid market for the Units. You may not be able to find a buyer on the SGX-ST when you wish to sell your Units. While the Sub-Fund intends to appoint at least one market maker to assist in creating liquidity for investors, liquidity is not guaranteed and trading of Units on the SGX-ST may be suspended in various situations. 	
Product-Specific Risks	
<ul style="list-style-type: none"> ● You are exposed to counterparty risks related to the Sub-Fund’s P-Notes investments. <ul style="list-style-type: none"> ○ The Sub-Fund will be exposed to the credit risk of the P-Notes issuer. As the Sub-Fund currently has 1 P-Notes issuer (i.e. BNP), the Sub-Fund may be subject to over-concentration risks of having a single counterparty and be exposed to a higher level of risk than portfolios diversifying their holdings across different issuers. ○ Any default by BNP of its obligations under the P-Notes will have an adverse impact on the NAV of the Sub-Fund. ○ To limit the Sub-Fund’s net exposure to BNP, BNP will charge and assign collateral posted by BNP (in a Hong Kong trust/custodial account), to the Trustee as trustee for the Sub-Fund. ○ In the event BNP defaults on its obligations (e.g. due to winding-up or liquidation), security rights may be enforced against BNP. 	

- **The current P-Note issuer to the Sub-Fund is not constituted in Singapore and is governed by foreign laws. The P-Notes held by the Sub-Fund are also governed by foreign laws.**
 - The current P-Note issuer, BNP, is established under the laws of the Netherlands and is governed by Dutch laws.
 - Enforceability of the P-Notes will be dependent on, amongst other considerations, their validity under their governing law i.e. English law.
 - Enforceability of security rights against BNP may be governed by Dutch law (the law of the jurisdiction in which BNP is established) and Hong Kong law (as the trust/custodial account is maintained in Hong Kong and as the governing law of the security deed). The NAV of the Sub-Fund will be adversely affected to the extent that such security is not effectively enforced.
- **You are exposed to the risk that the duration of the Sub-Fund may be limited.**
 - The P-Notes currently held by the Sub-Fund are of limited duration (scheduled to mature on 8 November 2017) and the duration of the Sub-Fund depends on, amongst other things, the ability of the Sub-Fund to continue investing in P-Notes after the term of the P-Notes currently held by the Sub-Fund. The P-Notes may also be redeemed early upon the occurrence of certain events under the terms and conditions of the P-Notes and the Sub-Fund may suffer a substantial loss on its investment in the P-Notes in such an event. *You should therefore note that you may not get back your original investment in the Sub-Fund.*
- **You are exposed to risks relating to the QFII investment quota.**
 - The investment quota of a QFII may be restricted, suspended or halted which may adversely affect the supply of P-Notes available to the Sub-Fund. This may result in the Sub-Fund being unable to create further Units and/or cause Units to trade at a premium to its NAV.
- **You are exposed to tracking error risk.**
 - Tracking error occurs when funds are unable to track exactly the performance of their underlying indices. Due to its investment structure, the Sub-Fund may experience greater tracking error than typical exchange traded index funds.
- **You are exposed to derivatives risks.**
 - The Sub-Fund will use or invest in P-Notes which are FDIs and may also invest in other FDIs, including options, swaps and warrants. An investment in a FDI may require the deposit of initial margin and additional deposit of margin on short notice if the market moves against the investment position. If the required margin is not provided in time, the investment may be liquidated at a loss. Therefore, it is essential that such investments in FDIs are monitored closely. We have the controls for investments in FDIs and have in place systems to monitor the derivative positions of the Sub-Fund.
