

THE POWER OF REGULAR SAVINGS PLAN (RSP)

They say that **‘consistency is more powerful than perfection’** and this applies to growing your investment portfolio too!

A **Regular Savings Plan (RSP)** allows you to enjoy the benefits of **‘dollar-cost averaging’** - a simple yet effective strategy that uses the natural cycles of the market to grow long-term wealth.

So how does it work?

If you had invested S\$5,000 as a lump sum in the first month, you would have only acquired **20 units** at a cost of **S\$250** per unit.

With consistent monthly contributions, you would have acquired **45.67 units** for S\$5,000 and your average cost per unit is **S\$109.49** at the end of five months.

You can free yourself from emotional investing! Enjoy the benefits of dollar-cost averaging and onboard a seamless investment journey.

Get up to S\$50 credits* when you set up a Regular Savings Plan (RSP) today!
