# How does Simple Solutions Series<sup>2</sup> work?

In managing the **Income** and **Growth** solutions, UOBAM will actively select, allocate, monitor and adjust based on long-term fundamentals and short-term tactical allocation to meet the investment objectives.

## Selection

UOBAM leverages on its fund management expertise to select the underlying funds for investment by analysing risk and return drivers for each underlying fund. Based on market conditions and investment trends, it selects the funds that are able to capture opportunities suited for each strategy.

## Allocation

UOBAM then dynamically allocates between the funds, employing its in-house asset allocation and screening capabilities, taking into account views on the financial markets. Besides incorporating longer-term strategic views based on fundamentals, it also makes shorter-term tactical allocation decisions based on technical factors.

## Monitoring and Adjustment

UOBAM consistently monitors the underlying funds' performance, changes in investment process and style. Based on its in-house investment views, it will make adjustments and rebalancing decisions where necessary.

## UOBAM advantage

UOBAM is a multiple award-winning Asian asset manager with S\$36 billion of assets under management<sup>3</sup>. Established as a wholly-owned subsidiary of UOB in 1986 and headquartered in Singapore, it has grown into a regional powerhouse with a presence in eight markets across Asia.
