Appendix – Investment focus and approach of the Sub-Fund

United Enhanced Growth Select (to be renamed United Growth Fund)

Investment focus and approach prior to the Effective Date	Investment focus and approach with effect from the Effective Date
<p>The Sub-Fund adopts a fund-of-funds approach, and will invest in various Underlying Entities that have demonstrated track record of consistent net asset value (“NAV”) growth. The focus is to invest in Underlying Entities¹ that buy stocks in companies that are growing faster than the market average, hence delivering higher capital growth than the general market. This growth strategy will have capital gains as the main driver of return and may have higher volatility than the general market.</p> <p>The Sub-Fund has an initial allocation of 60% to global funds and 40% to Asian funds, as well as 60% in Core strategy and 40% in Thematic strategy, with permissible deviation of 20% for both.</p> <p><i>Global funds</i> are those which invest in stock-related securities of companies listed and traded on stock exchanges globally.</p> <p><i>Asian funds</i> are those which invest the majority of their assets in stock-related securities and securities such as American Depositary Receipts issued by corporations in Asia (including Japan), Australia and New Zealand.</p> <p><i>Core strategy</i> refers to investment in growth stocks in the broad market with no specific focus on industry sectors or trends.</p> <p><i>Thematic strategy</i> refers to investment based on specific growth trends or themes identified by the Managers from time to time, which results in a focus in selected industries or concepts. Examples of such trends include artificial intelligence, healthcare and disruptive technologies.</p> <p>The Sub-Fund also intends to invest across different managers so as to achieve diversification of manager risks. The regional and Core/Thematic allocations may vary over time. The key elements of the investment approach are as follows:</p>	<p>The Sub-Fund aims to achieve its objective by investing primarily in companies which shall be incorporated in, listed in, traded or dealt globally.</p> <p>The Sub-Fund may be exposed to these companies by investing in Underlying Entities such as funds, exchange traded funds (“ETFs”) or Real Estate Investment Trusts (“REITs”). The Sub-Fund may also invest in equity, equity-related securities, bond or debt instruments of these companies directly.</p> <p>The Sub-Fund aims to minimize risk and maximize total investment return consisting of capital appreciation, on an ancillary basis, dividend and coupon income by actively managing its asset allocation, regional allocation, and overall level of exposure to the markets globally.</p> <p>The Sub-Fund will typically allocate 80% of the Sub-Fund’s NAV in <i>Equity Underlying Entities</i> and 20% of the Sub-Fund’s NAV in <i>Fixed Income Underlying Entities</i>, with a deviation of 20% for each asset class. The primary focus on equities in the Sub-Fund may lead to higher return and/or volatility. The fixed income component in the Sub-Fund serves to provide diversification to the portfolio performance. While complying with the above, the Sub-Fund also has flexibility to allocate into various asset classes and direct securities, and may even hold cash as required.</p> <p><i>Equity Underlying Entities</i> are those funds, ETFs and/or REITs which invest primarily in stocks-related securities of companies listed and traded on stock exchanges.</p> <p><i>Fixed Income Underlying Entities</i> are those funds and/or ETFs which invest primarily in fixed income instruments.</p> <p>In the event that the Sub-Fund is investing in the Underlying Entities, the Managers intend to invest across different managers so as to achieve</p>

¹ “Underlying Entity” means an investment company or sub-fund of an investment company or unit trust scheme or exchange traded fund or mutual fund or other collective investment scheme from time to time determined by the Managers to be invested into by a Sub-Fund.

<p>1. Defining the investable universe of funds</p> <p>The objective is to find funds or managers with different investment styles and sources of growth who can deliver consistent capital growth over time.</p> <p>2. Optimising portfolio and applying qualitative overlay</p> <p>After conducting due diligence, we will select funds that meet the investment criteria of delivering consistent growth. We will implement a qualitative overlay to the allocation by assessing the Underlying Entities to ensure adequate diversification and to express the portfolio manager's fundamental view.</p> <p>3. Portfolio review and rebalancing</p> <p>We will rebalance the portfolio on a regular basis to ensure that the style and geographical allocations are aligned with the view of the portfolio manager. We will also undertake periodic review of the Underlying Entities to ensure that they remain suited for the portfolio. Based on the reviews, we may replace Underlying Entities from the portfolio, or change the allocation to each Underlying Entity.</p> <p>4. Use of derivatives</p> <p>Financial derivative instruments ("FDIs") may be used for the purposes of hedging existing positions, efficient portfolio management, or a combination of both purposes.</p> <p>5. Holdings in cash or near-cash instruments</p> <p>In the event of extreme market conditions or severe market stress or disruptions, or if there are no suitable investment opportunities for the portfolio at any time, the Sub-Fund may temporarily hold up to 20% of its assets in cash and/or cash deposits, money market instruments and/or short-term debt securities. A portion of the Sub-Fund's assets may also be retained in liquid investments or cash for liquidity purposes.</p>	<p>diversification of manager risks. The allocations of each underlying holdings may vary over time, depending on the market conditions. The key elements of the investment approach are as follows:</p> <p>1. Defining the investable universe</p> <p>The objective is to find Underlying Entities or managers with expertise, scale, proven track records and who can deliver consistent return over time for the expression of the Managers' view. The Managers may also express their view by investing in direct securities if there is a better opportunity than investing in Underlying Entities.</p> <p>2. Optimising portfolio and allocation</p> <p>After conducting due diligence, Underlying Entities that meet the investment criteria of delivering consistent return will be selected. Depending on the market conditions and the phase of business cycle, different weights will be assigned to the Underlying Entities to express the Managers' fundamental view. In addition, an overlay to the allocation will be implemented to ensure adequate diversification.</p> <p>3. Portfolio review and rebalancing</p> <p>The portfolio will be rebalanced on a regular basis to ensure that the allocations are aligned with the view of the Managers. A periodic review of the underlying holdings will be undertaken to ensure that they remain suited for the portfolio. Based on the reviews, the underlying holdings may be replaced from the portfolio, or the allocation to each underlying holding may be changed.</p> <p>4. Use of derivatives</p> <p>FDIs, such as forward contracts, futures contracts, options and swaps, may be used for the purposes of hedging existing positions, efficient portfolio management, optimising returns or a combination of such purposes.</p> <p>5.
