#### **UOBAM Investment Clock**

**Bottom of bust** 

## 2. Mixed datapoints point to a "rolling recession"

Recession in goods and housing sectors

- Deep contraction in manufacturing Purchasing Managers' Index (PMIs).
- Sharp contraction in housing starts.
- Weak and negative earnings in many retail industries.

Continued expansion in many service sectors

- Travel, leisure, and entertainment sectors seeing high demand and strong employment.
- Service sector PMIs much more resilient for over a year.

## 3. Positive on high grade fixed income, neutral on equities
