

Maximise your idle funds with the best of both worlds

Notes:

- ¹ Adjusting overall risk appetite or setting constraints may potentially result in a sub-optimal portfolio and a deviation from UOBAM's recommendations. Changing the level of exposure refers to the exposure from the funds rather than direct investments into these asset classes.
- ² The Success Probability is statistically calculated and it is not a guarantee of the principal sum invested by you or any rate of return. The portfolio may lose money. UOBAM does not make any prediction, promise or guarantee of any kind. Market prices may go up and down and past performance is not an indicator of any future or likely performance or outcome. UOBAM may (but is not obliged to) update the Success Probability and any portfolio projection from time to time if there is a change in UOBAM's expectations or assumptions.

Your journey with UOBAM Invest

Digital Adviser
For corporates who prefer to receive **professional advice** and a customised portfolio.

Set your corporate investment objectives
Complete an online risk assessment so we understand your investment goals, risk tolerance level and investment horizon.

Review the portfolio that we've built for you
You will receive a customised portfolio based on your input. Fine-tune it further by adjusting your overall risk appetite or setting limits to your level of exposure for each asset class¹.

Use the portfolio planner to aggregate all your investment goals
Input all your inflows such as current and future contributions, and outflows such as expense goals. Plan ahead for up to 30 years and prioritise your goals. The portfolio planner will then calculate the success probability² of your plan.

Make a contribution to start
Top up your Digital Adviser account using bank payment modes such as Bill Payment via UOB BIBPlus, cheques or telegraphic transfers.

Leave the investing to us while you run your business
We'll review and rebalance your portfolio quarterly and whenever you make new contributions or withdrawals to stay relevant in different market cycles.
